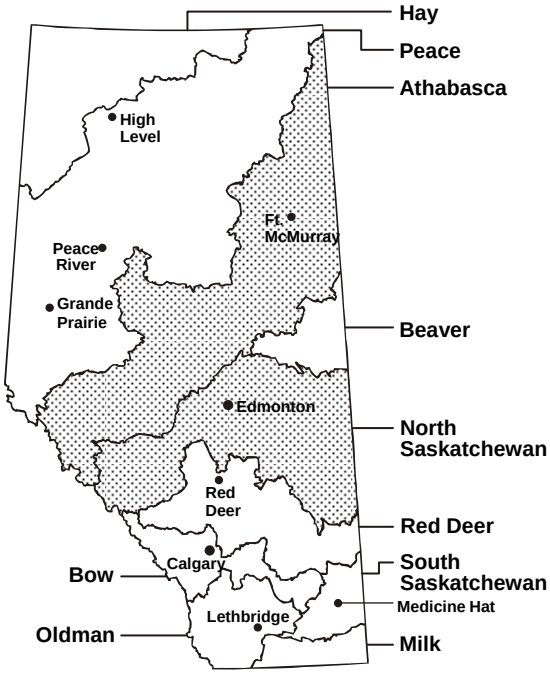
Government of Alberta

High Streamflow Advisory Update

Issued at 2:00 PM - July 27, 2012
Issued by River Forecast Centre

River Basins Currently with Advisories



Information in addition to this advisory may be found at:

http://www.environment.alberta.ca/forecasting/forecasterscomments

http://www.environment.alberta.ca/apps/basins

High Streamflow Advisory – Stream levels are rising or expected to rise rapidly and no major flooding is expected. Minor flooding in low-lying areas is possible. Anyone situated close to the streams affected is advised to be cautious of the rising levels.

Flood Watch – Stream levels are rising and will approach or may exceed bank full. Flooding of areas adjacent to these streams may occur. Anyone situated close to the river is advised to take appropriate precautionary measures.

Flood Warning – Rising stream levels will result in flooding of areas adjacent to the streams affected. Anyone situated close to the river should take appropriate measures to avoid flood damage.

Streamflow Advisory Overview for Alberta

Advisories apply to streams and their tributaries unless otherwise noted.

- Scattered showers are forecasted over much of central and northern Alberta over the next few days, as conditions throughout Alberta are unstable, although no organized precipitation is expected.
- River conditions are being monitored and updates will be issued as required.
