
High Streamflow Advisory for North Central Alberta

Alberta Environment's **High Streamflow Advisory** remains in effect for the following rivers and their tributaries in North Central Alberta:

- **Pembina River – downstream of the Paddle River confluence** (Athabasca River Basin through Jarvie)
- **Paddle River – downstream of Highway 764** (Athabasca River Basin – through Barrhead.)

The water level at Jarvie will continue to fall slowly and the water levels on the Pembina River downstream of the Paddle River confluence will remain high for the next few days. The water level at the Town Barrhead will continue to fall slowly and the water level will remain high for the next few days.

High Streamflow Advisory Ended for North Central Alberta

Alberta Environment's **High Streamflow Advisory** has ended for the following river and its tributaries in North Central Alberta:

- **Athabasca River – downstream of Fort McMurray** (including Fort McMurray)

The water level has peaked and is falling at the above location.

For more information, check the Forecaster's Comments on the department web site at:

<http://www.gov.ab.ca/env/water.html>

Alberta Environment is monitoring river levels closely and is in close contact with Environment Canada Weather Services. This advisory will be updated if the situation changes

A High Streamflow Advisory means that stream levels are rising or expected to rise rapidly and **no major flooding is expected**. Minor flooding in low-lying areas is possible. Anyone situated close to the streams affected (campers, fishermen, boaters and the general public) is advised to be cautious of the rising levels.

A Flood Watch means that stream levels are rising and will approach or may exceed bank full. Flooding of areas adjacent to these streams may occur. Anyone situated close to the streams is advised to take appropriate precautionary measures.

A Flood Warning means that rising river levels will result in flooding of areas adjacent to the streams affected. Anyone situated close to the river should take appropriate measures to avoid flood damage.
