

A further 20 to 50 millimetres of precipitation is forecast for Southwestern Alberta by noon tomorrow, before tapering to showers.

Flood Warning Issued for Southwestern Alberta

Alberta Environment has issued a Flood Warning for the following streams in Southwestern Alberta:

- **Elbow River (upstream of the Glenmore Dam and including the Town of Bragg Creek)**
- **Highwood River (including the Town of High River)**
- **Sheep River (including the Town of Black Diamond and Turner Valley)**
- **Threepoint Creek**

Heavy precipitation last night and today plus forecast precipitation for overnight tonight is expected to raise the river levels beyond bankfull in these streams.

Flood Watch Issued for Southwestern Alberta

Alberta Environment has issued a Flood Watch for the following streams in Southwestern Alberta:

- **Bow River (downstream of Calgary including Hidden Valley)**
- **Elbow River (downstream of the Glenmore Dam)**
- **Fish Creek**
- **Castle River**
- **Crowsnest River**
- **Jumpingpound Creek**
- **Pincher Creek**
- **Drywood Creek**
- **Willow Creek**

Heavy precipitation last night and today plus forecast precipitation for overnight tonight is expected to raise the river levels near bankfull in these streams.

Flood Watch Update for Southwestern Alberta

A Flood Watch remains in effect for the following streams in Southwestern Alberta:

- **Lee Creek**
- **Bow River at Calgary**

Lee Creek should exceed bankfull in rural areas, but not in Cardston. Flows into Calgary are being held constant by TransAlta Utilities, however flows downstream of where the Bow River meets the Elbow River are rising.

High Streamflow Advisory Issued for Southwestern Alberta

A High Streamflow Advisory has been issued for the following streams in Southwestern Alberta:

- Little Bow River
- Mosquito Creek

High Streamflow Advisory Update for Southwestern Alberta

A High Streamflow Advisory remains in effect for the following lakes and Southwestern Alberta streams originating in the upper Oldman and Bow River drainage basins, including the following and their tributaries:

- Waterton Lake
- Oldman River (including Fort McLeod and Lethbridge)
- Waterton River
- St. Mary River (upstream of the St. Mary Dam)
- Bow River (upstream of Calgary)
- Belly River
- Ghost River
- Waiparous Creek

River levels have risen and will rise again in response to further precipitation, with minor flooding possible in low lying areas. Higher outflows from the Oldman and Waterton dams will continue but will still remain below bankfull downstream.

Alberta Environment is monitoring river levels closely and is in close contact with Alberta Forestry Weather and Environment Canada Weather Services. Additional information is available from the Forecasters Comments on our website at: <http://environment.alberta.ca/forecasting/ForecastersComments/index.html>.

This advisory will be updated if there is any change in conditions.

A High Streamflow Advisory means that stream levels are rising or expected to rise rapidly and **no major flooding is expected**. Minor flooding in low-lying areas is possible. Anyone situated close to the streams affected (campers, fishermen, boaters and the general public) is advised to be cautious of the rising levels.

A Flood Watch means that stream levels are rising and will approach or may exceed bank full. Flooding of areas adjacent to these streams may occur. Anyone situated close to the streams is advised to take appropriate precautionary measures.

A Flood Warning means that rising river levels will result in flooding of areas adjacent to the streams affected. Anyone situated close to the river should take appropriate measures to avoid flood damage.
